

## Weather Imagery - Image TileServer - v3.0

Domain Portfolio: Weather Imagery | Domain: Raster-Tile | Usage Classification: Standard | API Name: Image TileServer - v3.0

**Geography:** Regionally Mixed

**Attribution Required:** Yes / Conditional

**Attribution Requirements:**

Radar Layer - Australia: Requires Attribution: “Australian Bureau of Meteorology” brand/trademark logo and Weblink. [www.bom.gov.au](http://www.bom.gov.au)  
Canada: Requires Attribution: “Environment and Climate Change Canada”  
The terms and conditions are specified here:

### Overview

The Image Tile Server API features a comprehensive set of tile-based products utilizing data from including radar, satellite, current conditions, and forecast information based on complex algorithms developed from TWC observation systems. It provides the ability to request tiles of varying resolution. The Image Tile Server product provides access to our most popular mapping layers pre-rendered with appropriate palettes, ready to be applied to your base map. Layers are served as pre-cut 256x256 png image files for interactive maps and other data visualization, addressed according to a XYZ tile address schema.

The process of identifying available layer data and corresponding layer tiles requires a 3-step process.

1. Get Inventory Series List which returns the valid timeslice and metadata for each tile layer.
2. Use the appropriate valid timeslice (ts & fts) as input to the timeslice parameters, and base map tile address as input into the XYZ parameter of the layer tile request.
3. Get specified Layer Tiles using the data from the Inventory Series response as input into the ‘ts’ and ‘fts’ parameters.

### HTTP Headers and Data Lifetime - Caching and Expiration

For details on appropriate header values as well as caching and expiration definitions, please see [The Weather Company Data | API Common Usage Guide](#).

### Update Frequency

In the Inventory Series each available layer includes a time slice (ts); The time slice (ts) is an Epoch formatted time stamp. This timestamp is used as input into the atomic layer api request for the available layers (with the given timestamp). Each layer timestamp is updated on a frequency dependent on the layer type (Observation, Forecast). A new Inventory Series request should be made at correlating intervals to the Layer type used in the client application.

For example: if the client application is using both Observation AND Forecast layers, then the Inventory Series API should be made in at least 5 minute intervals, however if only Forecast layers are used, then an updated Inventory Series could be extended out to 30 minute intervals.

Layer Type	Update Frequency
Observation Layers	5 Minutes
Forecast Layers	30 Minutes
Composite Radar & Satellite Layers	5 Minutes

URL Construction

Atomic API URL Examples:	
Inventory Series List: <b>Required Parameters:</b> <a href="#">apiKey</a> <b>Optional Parameters:</b> <a href="#">cb</a> , <a href="#">filter</a> <a href="https://api.weather.com/v3/TileServer/series/productSet/PPAcore?apiKey=yourApiKey">https://api.weather.com/v3/TileServer/series/productSet/PPAcore?apiKey=yourApiKey</a>	
<a href="https://api.weather.com/v3/TileServer/series/productSet/PPAcore?apiKey=yourApiKey">https://api.weather.com/v3/TileServer/series/productSet/PPAcore?apiKey=yourApiKey</a>  Optional <b>cb</b> parameter can be added (optional) if a jsonp callback is required. Get Inventory Series List with optional cb parameter: <a href="https://api.weather.com/v3/TileServer/series/productSet/PPAcore?cb=padding_wrapper&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/series/productSet/PPAcore?cb=padding_wrapper&amp;apiKey=yourApiKey</a>  Optional <b>filter</b> parameter can be added (optional) to filter results on a specific product: <a href="https://api.weather.com/v3/TileServer/series/productSet/PPAcore?filter=satrad&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/series/productSet/PPAcore?filter=satrad&amp;apiKey=yourApiKey</a>	
Current Conditions Layer: <b>Required Parameters:</b> <a href="#">ts</a> , <a href="#">X:Y:Z</a> , <a href="#">apiKey</a> <a href="https://api.weather.com/v3/TileServer/tile/&lt;layer_name&gt;?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/&lt;layer_name&gt;?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>	
<a href="https://api.weather.com/v3/TileServer/tile/radar?ts=1437426000&amp;xyz=0:0:1&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/radar?ts=1437426000&amp;xyz=0:0:1&amp;apiKey=yourApiKey</a>	
Forecast Layer: <b>Required Parameters:</b> <a href="#">ts</a> , <a href="#">fts</a> , <a href="#">X:Y:Z</a> , <a href="#">apiKey</a> <a href="https://api.weather.com/v3/TileServer/tile/&lt;layer_name&gt;?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/&lt;layer_name&gt;?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>	
<a href="https://api.weather.com/v3/TileServer/tile/radarFcst?ts=1428948600&amp;fts=1428949000&amp;xyz=0:0:1&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/radarFcst?ts=1428948600&amp;fts=1428949000&amp;xyz=0:0:1&amp;apiKey=yourApiKey</a>	
Layer Name	URL Example
Inventory Series	<a href="https://api.weather.com/v3/TileServer/series/productSet/PPAcore?apiKey=yourApiKey">https://api.weather.com/v3/TileServer/series/productSet/PPAcore?apiKey=yourApiKey</a>
Current Conditions Layers	
Current Conditions Layer - Dewpoint	<a href="https://api.weather.com/v3/TileServer/tile/dewpoint?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/dewpoint?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Feels Like	<a href="https://api.weather.com/v3/TileServer/tile/feelsLike?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/feelsLike?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Precipitation 1 Hour	<a href="https://api.weather.com/v3/TileServer/tile/precip1hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/precip1hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Precipitation 24 Hour	<a href="https://api.weather.com/v3/TileServer/tile/precip24hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/precip24hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Road Weather Index	<a href="https://api.weather.com/v3/TileServer/tile/rwi?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/rwi?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Snow 1 Hour	<a href="https://api.weather.com/v3/TileServer/tile/snow1hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/snow1hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Snow 24 Hour	<a href="https://api.weather.com/v3/TileServer/tile/snow24hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/snow24hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Snow Coverage 1 Hour Contiguous US	<a href="https://api.weather.com/v3/TileServer/tile/snowCoverageConus1hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/snowCoverageConus1hr?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Temperature	<a href="https://api.weather.com/v3/TileServer/tile/temp?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/temp?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Temperature Change	<a href="https://api.weather.com/v3/TileServer/tile/tempChange?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/tempChange?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>

Current Conditions Layer - Temperature Maximum	<a href="https://api.weather.com/v3/TileServer/tile/maxTemp?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/maxTemp?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Temperature Minimum	<a href="https://api.weather.com/v3/TileServer/tile/minTemp?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/minTemp?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Ultraviolet (UV)	<a href="https://api.weather.com/v3/TileServer/tile/uv?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/uv?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Wind Speed	<a href="https://api.weather.com/v3/TileServer/tile/windSpeed?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/windSpeed?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Wind Speed Gust	<a href="https://api.weather.com/v3/TileServer/tile/windSpeedGust?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/windSpeedGust?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Conditions Layer - Wind Speed Non-Masked ( <b>See Note below</b> )	<a href="https://api.weather.com/v3/TileServer/tile/windSpeedNM?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/windSpeedNM?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Radar Layer - Radar (North American Composite)	<a href="https://api.weather.com/v3/TileServer/tile/radar?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/radar?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Radar Layer - Radar Australia ( <b>Attribution Required</b> )	<a href="https://api.weather.com/v3/TileServer/tile/radarAustralian?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/radarAustralian?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Radar Layer - Radar Europe	<a href="https://api.weather.com/v3/TileServer/tile/radarEurope?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/radarEurope?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Radar Layer - Radar Mosaic	<a href="https://api.weather.com/v3/TileServer/tile/twcRadarMosaic?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/twcRadarMosaic?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Radar Layer - Radar Mosaic High-Coverage	<a href="https://api.weather.com/v3/TileServer/tile/twcRadarHcMosaic?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/twcRadarHcMosaic?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Satellite Layer - Satellite	<a href="https://api.weather.com/v3/TileServer/tile/sat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/sat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Satellite Layer - Satellite - Thermal IR	<a href="https://api.weather.com/v3/TileServer/tile/thermalSat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/thermalSat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Satellite Layer - Satellite Europe - Longwave Infrared	<a href="https://api.weather.com/v3/TileServer/tile/eulrSat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/eulrSat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Satellite Layer - Satellite Europe - Visible Spectrum	<a href="https://api.weather.com/v3/TileServer/tile/euVisSat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/euVisSat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Satellite Layer - Satellite - Visible Spectrum	<a href="https://api.weather.com/v3/TileServer/tile/satVis?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/satVis?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Satellite Layer - Satellite U.S.	<a href="https://api.weather.com/v3/TileServer/tile/ussat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/ussat?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Current Satellite / Radar Layer - Satellite & Radar	<a href="https://api.weather.com/v3/TileServer/tile/satrad?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/satrad?ts=&lt;ts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layers	
Forecast Layer - Clouds	<a href="https://api.weather.com/v3/TileServer/tile/cloudsFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/cloudsFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Dewpoint	<a href="https://api.weather.com/v3/TileServer/tile/dewpointFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/dewpointFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Feels Like	<a href="https://api.weather.com/v3/TileServer/tile/feelsLikeFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/feelsLikeFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Precipitation 1 Hour Cumulative	<a href="https://api.weather.com/v3/TileServer/tile/precip1hrCumulativeFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/precip1hrCumulativeFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Precipitation 24 Hour	<a href="https://api.weather.com/v3/TileServer/tile/precip24hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/precip24hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Precipitation and Snow 1 Hour Cumulative	<a href="https://api.weather.com/v3/TileServer/tile/precipAndSnow1hrCumulativeFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/precipAndSnow1hrCumulativeFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Snow 1 Hour Cumulative	<a href="https://api.weather.com/v3/TileServer/tile/snow1hrCumulativeFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/snow1hrCumulativeFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Snow 24 Hour	<a href="https://api.weather.com/v3/TileServer/tile/snow24hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/snow24hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Temperature	<a href="https://api.weather.com/v3/TileServer/tile/tempFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/tempFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>

Forecast Layer - Temperature 24 Hour Maximum	<a href="https://api.weather.com/v3/TileServer/tile/24hrMaxTempFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/24hrMaxTempFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Temperature 24 Hour Minimum	<a href="https://api.weather.com/v3/TileServer/tile/24hrMinTempFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/24hrMinTempFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Temperature Hourly	<a href="https://api.weather.com/v3/TileServer/tile/tempHourlyFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/tempHourlyFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Thunder 12 Hour	<a href="https://api.weather.com/v3/TileServer/tile/thunder12hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/thunder12hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Ultraviolet (UV)	<a href="https://api.weather.com/v3/TileServer/tile/uvFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/uvFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Ultraviolet (UV) 12 Hour	<a href="https://api.weather.com/v3/TileServer/tile/uv12hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/uv12hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Wind Speed	<a href="https://api.weather.com/v3/TileServer/tile/windSpeedFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/windSpeedFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Wind Speed 12 Hour	<a href="https://api.weather.com/v3/TileServer/tile/windSpeed12hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/windSpeed12hrFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Layer - Wind Speed Non-Masked ( <b>See Note below</b> )	<a href="https://api.weather.com/v3/TileServer/tile/windSpeedFcstNM?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/windSpeedFcstNM?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Lifestyle Index Layer - Aches and Pains	<a href="https://api.weather.com/v3/TileServer/tile/achesPainsFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/achesPainsFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Lifestyle Index Layer - Breathing	<a href="https://api.weather.com/v3/TileServer/tile/breathingFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/breathingFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Lifestyle Index Layer - Grass Pollen	<a href="https://api.weather.com/v3/TileServer/tile/grassPollenFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/grassPollenFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Lifestyle Index Layer - Ragweed Pollen	<a href="https://api.weather.com/v3/TileServer/tile/ragweedPollenFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/ragweedPollenFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>
Forecast Lifestyle Index Layer - Tree Pollen	<a href="https://api.weather.com/v3/TileServer/tile/treePollenFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey">https://api.weather.com/v3/TileServer/tile/treePollenFcst?ts=&lt;ts&gt;&amp;fts=&lt;fts&gt;&amp;xyz=&lt;X:Y:Z&gt;&amp;apiKey=yourApiKey</a>

**NOTE:** Many products make use of a land/sea mask to exclude data over bodies of water. “Non-Masked” products omit this mask, so their resulting images **do** include data over bodies of water.

As of March 6th, 2025, the radarFcstV2 product has been added as a new forecast layer. Product radarFcstV2 includes faster update frequency and significantly reduced latency between radar observation and forecast times compared to the radarFcst product.

Retrieving Tiles:

Request a 256x256 image tile or UTFGrid for a given layer. The XYZ parameters must be integer coordinates describing the tile position according to the XYZ tiling scheme. Once the client has parsed the series list and determined what layer they wish to display, they then need to request the appropriate tiles for their base map viewport. If the viewport contains tile addresses outside of this window, no call is needed as the tile will be empty. Clients will use the data returned in the Inventory Series response as input into the layer tile request via a series of calls, providing the layer, timestamp, and the X:Y:Z tile address.

Data Elements & Definitions

Field Name	Description	Type	Sample
Inventory Series			

seriesInfo	<div>The seriesInfo describes the available layers and the relevant information in the response to make the secondary call for the actual tiles and include:<ul style="list-style-type: none"><li>layer name: e.g. “clouds”</li><li>native zoom level: e.g. “nativeZoom”:6,</li><li>max zoom level: e.g. “maxZoom”:11,</li><li>bounding box defining opposite corners of the available region</li><li>series is time slice data required for secondary call for layer imagery</li></ul></div>	object	{ "seriesInfo": { "clouds": {}, "windSpeed": {}, "windSpeedFcst": {} } }
nativeZoom	The native zoom level is the default zoom level for the corresponding image.	integer	6
maxZoom	The max zoom level is the maximum zoom level available for the corresponding image.	integer	11
bb	<div>The bounding box (bb) defines the top left tile (tl) and bottom right (br) tile of the bounding box using the geocode locations defined by latitude (lat) and longitude (lng) tile address scheme. The bb (bounding box for valid tile addresses, defined by opposing geocodes) &amp; Equates to Layer Tile Input - Valid X:Y:Z addresses within the bounding box, defined by two geocodes.<div><div>tl : Top Left Corner</div><div>lat: top left latitude</div><div>lng: top left longitude</div><div>br: Bottom Right Corner</div><div>lat: bottom right latitude</div><div>lng: bottom right longitude</div></div><div>Base Map tile address: e.g.<ul style="list-style-type: none"><li>Google = XYZ scheme</li><li>Mapbox = XYZ scheme</li><li>Bing = Quadkey scheme</li></ul></div></div>	decimal	"bb": { "tl": { "lat": "-180.05", "lng": "90.05" }, "br": { "lat": "180.05", "lng": "-90.05" } },
tl	The response which defines the top left tile address defining the bounding box of the layer, tile addresses falling outside the bounding box will always be empty.	decimal	"lat": "-180.05", "lng": "90.05"
br	The response which defines the bottom right tile address defining the bounding box of the layer, tile addresses falling outside the bounding box will always be empty.	decimal	"lat": "180.05", "lng": "-90.05"
series	The series provides the relevant details required to pull the tiles associated with a layer, with the details contained in an array of values, associating each available time slice (ts) with a set of corresponding forecast time slices (fts).	epoch	{ "ts": 1437425100, "fts": [1437445800] },
ts	The time slice (ts) is an Epoch formatted time stamp. The example (ts) equates to: GMT: Mon, 20 Jul 2015 20:30:00 GMT	epoch	1437424200
fts	Forecast Time Slice (fts) is an Epoch formatted time stamp. The example (fts) equates to: GMT: Tue, 21 Jul 2015 02:00:00 GMT	epoch	1437444000
Tile Layers			
ts	The time slice (ts) is an Epoch formatted time stamp. The example (ts) equates to: GMT: Mon, 20 Jul 2015 20:30:00 GMT	epoch	1437424200
fts	Forecast Time Slice (fts) is an Epoch formatted time stamp. The example (fts) equates to: GMT: Tue, 21 Jul 2015 02:00:00 GMT	epoch	1437444000
xyz	The xyz is the tile address scheme. Each tile is given an X and Y coordinate ranging from (0) in the upper left to (2 <sup>zoom</sup> -1, 2 <sup>zoom</sup> -1) in the lower right of a	integer	0:0:1

	<div>Mercator Projected map.<ul style="list-style-type: none"><li>• x ranges from 0 (left edge is 180°W) to <math>2^{\text{zoom}} - 1</math> (right edge is 180°E) with <math>\text{TileX} = \text{floor}(\text{mapPixelX} / 256)</math></li><li>• y ranges from 0 (top edge is 85.0511°N) to <math>2^{\text{zoom}} - 1</math> (bottom edge is 85.0511°S) with <math>\text{TileY} = \text{floor}(\text{mapPixelY}/256)</math></li><li>• z is the zoom level defined for the image</li></ul></div>

    }
  ]
}
```

**JSON Sample - The Series List:**

The Image Tile Server API will serve a series list, in Json / Jsonp, which will describe the layers that are available, the time slices which are currently available, the native zoom for the layer, the maximum zoom for the layer, and a bounding box confining the layer. The Series list will contain entries for each layer such as:

Current Conditions Layer: dewpoint	Forecast Layer: cloudsFcst
{ "seriesInfo": { "dewpoint": { "nativeZoom": 4, "maxZoom": 13, "bb": {	{ "seriesInfo": { "cloudsFcst": { "nativeZoom": 5, "maxZoom": 13, "bb": { "tl": {

<pre>"tl": {   "lat": "-180.05",   "lng": "90.05" }, "br": {   "lat": "180.05",   "lng": "-90.05" } }, "series": [ {   "ts": 1458304200,   "fts": [] }, }, }, (Additional Responses From the “clouds” series collapsed for presentation only) ], }, "cloudsFcst": {}, (Layer &amp; Series data collapsed for presentation only) "dewpointFcst": {}, "feelsLike": {}, "feelsLikeFcst": {}, "precip24hr": {}, "precip24hrFcst": {}, "radar": {}, "radarAustralian": {}, "radarFcst": {}, "rwi": {}, "satradFcst": {}, "snow24hr": {}, "snow24hrFcst": {}, "temp": {}, "tempChange": {}, "tempFcst": {}, "uv": {}, "uvFcst": {}, "windSpeed": {}, "windSpeedFcst": {} (Additional layers omitted for presentation only) } }</pre>	<pre>"lat": "-180.0", "lng": "90.0" }, "br": {   "lat": "179.959936523",   "lng": "-90.00000762939453" } }, "series": [ {   "ts": 1458304200,   "fts": [     1458329400,1458328500,1458327600,1458326700,1458325800,1458324900,1458324000,1458323100,1458322200,1458321300,1458320400,1458319500,1458318600,1458317700,1458316800,1458315900,1458315000,1458314100,1458313200,1458312300,1458311400,1458310500,1458309600,1458308700,1458307800,1458306900,1458306000,1458305100]   ],   {     "ts": 1458303300,     "fts": [] (fts Series data collapsed for presentation only)   }   ],   },   "dewpoint": {}, (Layer &amp; Series data collapsed for presentation only)   "dewpointFcst": {},   "feelsLike": {},   "feelsLikeFcst": {},   "precip24hr": {},   "precip24hrFcst": {},   "radar": {},   "radarAustralian": {},   "radarFcst": {},   "rwi": {},   "satradFcst": {},   "snow24hr": {},   "snow24hrFcst": {},   "temp": {},   "tempChange": {},   "tempFcst": {},   "uv": {},   "uvFcst": {},   "windSpeed": {},   "windSpeedFcst": {} (Additional layers omitted for presentation only)   } }</pre>

Address Tile Scheme

Converting between QuadKey and XYZ:

The subsequent tile layer requires a tile address in the XYZ scheme. The XYZ parameters must be integer coordinates describing the tile position according to the XYZ tiling scheme.

The tile address format is determined by the underlying base map that a client chooses to use. For example:

- Google uses XYZ scheme
- Mapbox uses XYZ scheme
- Bing uses the QuadKey scheme

The Bing Base Map tile address requires conversion from QuadKey to the XYZ scheme; see linked reference: - [Bing Maps Reference](#) - <https://msdn.microsoft.com/en-us/library/bb259689.aspx>.

Example code to convert the QuadKey tile address to XYZ scheme

```
object QuadKey {
  def getQuadKey(x:Int, y:Int, level:Int):String = {
    val quadKey = new StringBuilder()
    (level to 1 by -1).foreach( zoomLevel => {
      val mask = 1 << (zoomLevel-1)
      quadKey.append(appendValue( (x & mask) != 0, (y & mask) != 0 ) )
    })
    quadKey.toString()
  }
  def appendValue(xMask:Boolean, yMask:Boolean):Int = (xMask,yMask) match {
    case (true, true) => 3
    case (_, true)   => 2
    case (true, _)   => 1
    case _           => 0
  }
}

def getXYZZoom(quadKey:String):XYZ =
{
  var x = 0
  var y = 0
  var zoom = quadKey.length

  (zoom to 1 by -1).foreach(i => {
    val mask = 1 << (i - 1)
    val cell = quadKey.charAt(zoom - i).toInt
    if ((cell & 1) != 0)
```

```
{
  x = x + mask
}
if ((cell & 2) != 0)
{
  y = y + mask
}
})
XYZ(x, y, zoom)
}}
```

### Base Map Implementation: Google

Using the Google API, a custom weather layer is done by extending the ImageMapType. The Google API will make a number of calls to the ImageMapType.getTile() when the layer is displayed. The getTile() function takes the tileCoord: Point, and a zoom: Int variable, which create the XYZ parameter needed in the Tile request url.

Weather Imagery Layers: Color Palette Legends

Please use SSDS Catalog for additional information on palettes.

Temperature

24hrMaxTempFcst : Forecast Layer - Temperature 24 Hour Maximum

24hrMinTempFcst : Forecast Layer - Temperature 24 Hour Minimum

maxTemp : Current Conditions Layer - Temperature Maximum

minTemp : Current Conditions Layer - Temperature Minimum

temp : Current Conditions Layer - Temperature

tempFcst : Forecast Layer - Temperature

tempHourlyFcst : Forecast Layer - Temperature Hourly

Color	RGB	Value (Temp F)
	40, 10, 70	-70
	80,50,130	-50
	160,130,190	-30
	110,0,70	-10
	160,50,140	0
	205,95,200	10
	170,225,250	20
	100,125,190	30
	20,20,150	40
	115,105,100	50
	215,215,50	60
	220,150,0	70
	220,40,0	80
	150,0,0	90
	245,125,200	100
	210,210,210	110
	240,240,175	130

tempChange : Current Conditions Layer - Temperature Change

Color	RGB	Value (Temp F)
	50,30,100	-55
	35,20,135	-45
	15,10,175	-35
	0,0,220	-25
	90,105,235	-15
	180,210,255	-5
	215,215,50	+5
	215,155,25	+15
	220,90,0	+25
	220,40,0	+35
	150,0,0	+45
	150,0,60	+55

Thunder

**thunder12hrFcst** : Forecast Layer - Thunder 12 Hour

Color	RGB	Value
	244,134,28	1, 2 (thunder possible, expected)
	181,9,15	3, 4 (severe thunderstorms possible, likely)
	255,255,255	5 (high risk of severe thunderstorms)

Ultraviolet

**uv** : Current Conditions Layer - Ultraviolet (UV)  
**uv12hrFcst** : Forecast Layer - Ultraviolet (UV) 12 Hour  
**uvFcst** : Forecast Layer - Ultraviolet (UV)

Color	RGB	Value (Index)
	90,85,80	1-2
	120,120,115	3
	150,150,150	4
	140,110,90	5
	190,175,80	6
	240,240,63	7
	220,135,20	8
	220,75,15	9
	220,15,15	10
	215,65,140	11

Wind Speed

**windSpeed** : Current Conditions Layer - Wind Speed  
**windSpeed12hrFcst** : Forecast Layer - Wind Speed 12 Hour  
**windSpeedFcst** : Forecast Layer - Wind Speed  
**windSpeedFcstNM** : Forecast Layer - Wind Speed Non-Masked  
**windSpeedGust** : Current Conditions Layer - Wind Speed Gust  
**windSpeedNM** : Current Conditions Layer - Wind Speed Non-Masked

Color	RGB	Value (mph)
	70,210,255	10
	65,190,255	15
	25,120,255	20
	0,70,190	25
	0,50,170	30
	0,25,130	35
	0,0,90	40
	50,5,120	45
	100,15,150	50
	130,5,125	55
	165,0,100	60+

Document Revision History

Revision	Date	Notes
1.0	Dec 7, 2018	Initial versioned document; addition of Document Revision History In document header, addition of Usage Classification and addition of Attribution Requirements for Canada In table listing Current Conditions Layers, addition of "Satellite," "Satellite & Radar," and "U.S. Satellite" In table listing Forecast Layers, clarification with the "Radar" layer name changed to "Radar Forecast"
1.1	April 30, 2019	Adjust Snowfall 24 hr to match updated palette
1.2	July 3, 2019	Addition of 24 paletted image products, including new color palette legends Substantial restructuring of color palette legends
1.3	March 6, 2025	Added new product radarFcstv2; addition of Document Revision History
