Aggregate Engine - Common Parameter (aggcommon) - v3.0

Domain Portfolio: Utility | Domain: Aggregation | Usage Classification: Standard

Geography: Global   **Attribution Required:** NO   **Attribution Requirements:** N/A

Overview

The Aggregate - Common API provides aggregation capabilities to aggregate API products within a single request. The Aggregate common is an aggregation model in which atomic API products share common parameters across each of the atomic API products included in the aggregate request. The required parameters are dependent on the required parameters of the individual API products included in the request.

> Your content licensing agreement with TWC determines which APIs can be used in the Aggregation Engine and is constrained by the API Key entitlements that is provided to your company. Each individual API and APIs, for example, with days (3, 5, 7, 10 days) is an atomic API endpoint. Your API key must be authorized for each atomic API endpoint to successfully request a given API endpoint and aggregate request. If your API key is authorized for only the 3 day endpoint, and you attempt to request a 10 day duration, you will get an error stating that "Api not allowed for this api key." If you attempt to include an API in the aggregation request which your API key is not authorized for, the request will return an error.

Aggregation is the combining of two or more atomic API (individual API) calls into a single HTTP request. An "atomic API" call references any of the API's that your API Key is authorized for.

- Products included in the aggregation request must be semicolon separated (;). Query parameters are required for all requests.
- Atomic API products can be called using their assigned 'short-name' alias for aggregation. APIs that support aggregation will have a defined 'short-name' alias documented.

Aggregate Limitations

Important limitations on what can be produced and supported through aggregation:

1. Aggregations are limited to a total **uncompressed** response size of **less than 1 megabyte total** (the entire response for the complete aggregation cannot exceed 1 megabyte).
2. URL's are limited to approximately 4,000 characters in length (including protocol, hostname, path and query string).
3. Aggregations are limited to a total of 50 atomic APIs.

For all practical purposes, the most likely limits you will hit in using aggregation are the payload and character restrictions (especially the total uncompressed size).

WARNING: Due to the nature of the implementation of aggregation, if your request or response does violate any of the above limitations, you will receive an error response with a 5XX HTTP Status code

HTTP Headers and Data Lifetime - Caching and Expiration

For details on appropriate header values as well as caching and expiration definitions, please see **The Weather Company Data | API Common Usage Guide.**

URL Construction

Request by Geocode: **Required Parameters:** geocode, units, language, format, [* Product Specific Parameters *], apiKey=**yourApiKey**
Weather Company Data Core: https://api.weather.com/**v3/aggcommon**/<**semicolon-separated product list**>?**geocode=<geocode>**&language=<language>&format=<format>&units=<units>&**apiKey=yourApiKey**

Weather Company Data Core:	https://api.weather.com/v3/aggcommon/v3-wx-forecast-daily-3day;v2obs;v3-location-point?**geocode=33.74,-84.39**&language=en-US&units=e&format=json&apiKey=**yourApiKey**
Weather Company Data Enhanced Current Conditions: Weather Company Data Enhanced Forecast:	https://api.weather.com/v3/aggcommon/v2obscurrent;v2pwsObsCur;v3-location-point?stationId=**KVAHAMPT76&geocode=33.74,-84.39**&language=en-US&units=e&format=json&apiKey=**yourApiKey** https://api.weather.com/v3/aggcommon/v3-wx-observations-current;v3-location-point?**geocode=33.74,-84.39**&language=en-US&units=e&format=json&apiKey=**yourApiKey**

Request by IATA Code: **Required Parameters:** iataCode, units, language, format, [* Product Specific Parameters *], apiKey=**yourApiKey** https://api.weather.com/**v3/aggcommon**/<**semicolon-separated product list**>?**iataCode=<iataCode>**&language=<language>&format=<format>&units=<units>&**apiKey=yourApiKey**
https://api.weather.com/v3/aggcommon/v3-wx-observations-current;v3-wx-conditions-historical-dailysummary-30day;v3-location-point?**iataCode=FCO**&language=en-US&units=e&format=json&apiKey=**yourApiKey**

Request by ICAO Code: **Required Parameters:** icaoCode, units, language, format, [* Product Specific Parameters *], apiKey=**yourApiKey** https://api.weather.com/**v3/aggcommon**/<**semicolon-separated product list**>?**icaoCode=<icaoCode>**&language=<language>&format=<format>&units=<units>&**apiKey=yourApiKey**
https://api.weather.com/v3/aggcommon/v3-wx-observations-current;v3-wx-conditions-historical-dailysummary-30day;v3-location-point?**icaoCode=LIRF**&language=en-US&units=e&format=json&apiKey=**yourApiKey**

Request by Place ID: **Required Parameters:** placeid, units, language, format, [* Product Specific Parameters *], apiKey=**yourApiKey** https://api.weather.com/**v3/aggcommon**/<**semicolon-separated product list**>?**placeid=<placeid>**&language=<language>&format=<format>&units=<units>&**apiKey=yourApiKey**
https://api.weather.com/v3/aggcommon/v3-wx-observations-current;v3-wx-conditions-historical-dailysummary-30day;v3-location-point?**placeid=25d07eca1bcda02800c1a9e699d7eb1c8132cad9bc2d6efa8a2531f0ee4a81cd**&language=en-US&units=e&format=json&apiKey=**yourApiKey**

Request by Postal Key: **Required Parameters**: postalKey, units, language, format, [* Product Specific Parameters *], apiKey=**yourApiKey** https://api.weather.com/**v3/aggcommon**/<**semicolon-separated product list**>?**postalKey=<postalKey>**&language=<language>&format=<format>&units=<units>&**apiKey=yourApiKey**
https://api.weather.com/v3/aggcommon/v3-wx-observations-current;v3-wx-conditions-historical-dailysummary-30day;v3-location-point?**postalKey=30339:US**&language=en-US&units=e&format=json&apiKey=**yourApiKey**

Note: Unique to this API is the ability to request by multiple **geocodes** and **placeids** as a semicolon-seperated product list. See below for details.

Request by Geocodes [Multiple Locations]: **Required Parameters:** geocode, units, language, format, [* Product Specific Parameters *], apiKey=**yourApiKey** https://api.weather.com/**v3/aggcommon**/<**semicolon-separated product list**>?**geocodes=<geocode>;<geocode>**&language=en-US&format=<json>&units=<units>&**apiKey=yourApiKey**

geocode(s) query parameter is a semicolon-separated list of geocodes. The result is an array of elements with each element exactly the same as a single location response.
   ● **Note**: if requesting multiple locations, the geocode field must be plural (geocode**s**) whereas a single location request the geocode field remains singular (geocode).
   ● **geocodes=34.44,-83.00;41.40,-38.19**

https://api.weather.com/v3/aggcommon/v2fcstdaily3;v2obs;v3-location-point?**geocodes=34.44,-83.00;41.40,-38.19**&language=en-US&units=e&format=json&apiKey=**yourApiKey**

Request by Place IDs [Multiple Locations]: **Required Parameters:** placeid, units, language, format, [* Product Specific Parameters *], apiKey=**yourApiKey** https://api.weather.com/**v3/aggcommon**/<**semicolon-separated product list**>?**placeids=<placeid>;<placeid>**&language=en-US&format=<json>&units=<units>&**apiKey=yourApiKey**

> *geocode(s)* query parameter is a semicolon-separated list of placeids. The result is an array of elements with each element exactly the same as a single location response.
> - **Note**: if requesting multiple locations, the placeid field must be plural (placeid**s**) whereas a single location request the placeid field remains singular (placeid).
> - placeids=1a8af5b9d8971c46dd5a52547f9221e22cd895d8d8639267a87df614d0912830;501361e097b79e8221d5c0b1447e80a0bf1c48b8fee1e4d98d4dad397ba2f204&language=en-US&apiKey=2e3b622cd8ae1c242 a3f8205e59b701e

https://api.weather.com/v3/aggcommon/v2fcstdaily3;v2obs;v3-location-point?**placeids=1a8af5b9d8971c46dd5a52547f9221e22cd895d8d8639267a87df614d0912830;501361e097b79e8221d5c0b1447e80a0bf1c48b8fee1e4d98d4 dad397ba2f204&language=en-US&apiKey=2e3b622cd8ae1c242a3f8205e59b701e**&language=en-US&units=e&format=json&apiKey=**yourApiKey**
